XM radio is a great device, I travel a great deal all over the state of Florida and I keep up to date in whatever area I am at. With the hurricane season coming up I was looking at XM to keep me well informed as to weather updates and travel routes that will need to be taken. In addition, I am not continually bombarded with inane commercials and nonsense. I find that I do not flip all over the stations and miss what is important being broadcast. I can also keep in touch as to what is happening in my home location while away from home. Please consider XM as a great public service to your voters.
